

Software Engineer & Product Designer—

Working with innovative brands to prototype, refine, and ship high-performance digital products to millions.

My career in fast-moving startups has given me an all-hands-on deck approach to product. I'm looking to join your growing team as an engineering lead where I can use my understanding of user experience, my love of development best practices, and my experience working with diverse teams to take on new technical challenges. You can find out more about me on [my website](#), or send me a message on [LinkedIn](#) if you'd like to talk about new opportunities.

 **Senior Software Engineer** | Driver & Vehicle Licensing Agency Sep 2023 – Current

I build high-reliability products and full-stack services used by millions of public customers, private businesses, and international clients, many with sensitive data requirements and time-critical workflows. I'm learning how to support critical public sector services in production and ensure our team's output is secure, tested, and audited to meet the high standards of the DVLA.

Agile Software Development, AWS Lambda, AWS S3, Docker, Documentation, Drone, JavaScript, Ruby on Rails, SASS, Unit Testing

 **Lead UX Engineer** | Planet Sport Dec 2022 – Sep 2022

I tackled user-experience innovation at one of the UK's top sports journalism brands, focusing on creating high-quality web experiences and mobile applications for millions of users annually. I developed and managed the production of new features using a range of technologies, directed team activities, conducted code/design reviews, and hosted meetings with stakeholders.

Auditing, Figma, GitHub Actions, Next.js, Node.js, Product Design, React, SASS, SEO, Tailwind, Team Leadership, TypeScript

 **Senior Front-End Engineer** | Tipstrr Sep 2020 – Nov 2022

I led front-end development of this data-heavy real-time sports tipping platform, collaborating with leadership and power-users to design new features and prototypes, create back-office tools, and improve the product experience for thousands of users. I improved legacy account management and checkout processes, brought stats and insights to life with intuitive designs, and boosted sign-up and partner click-through rates with engaging advertising techniques.

Angular, Figma, GitHub Actions, Next.js, Node.js, Product Design, SASS, SEO, Tailwind, TypeScript, Web Performance

 **Front-End Engineer** | Cruise Nation Jul 2018 – Aug 2020

I've designed and developed key features for an award-winning cruise travel e-commerce site. Building visually appealing and user-friendly checkout and marketing experiences, my front-end work allowed Cruise Nation to retain an edge against well-funded competitors, winning Best Cruise Holiday Retailer at the 2019 British Travel Awards for the second year running.

Backbone.js, Bitbucket Pipelines, CoffeeScript, JavaScript, Marketing, Adobe Photoshop, Product Design, SASS, SEO, Web Performance

 **Junior Front-End Engineer** | Thinqi Aug 2015 – Jun 2018

I prototyped interactive content and designed graphics for high-engagement, fully interactive e-learning experiences used to train the staff of global brand names like Boots, Honda, and Mitsubishi. Later I joined the dev team and worked closely with product managers to adapt to evolving business requirements, contributed to the design and specification of APIs alongside backend developers, and learned how to deliver a consistent, well-tested, and accessible user experience on the front-end.

Agile Software Development, Backbone.js, CoffeeScript, Graphic Design, Jenkins CI, Adobe Photoshop, SASS
